You will require the following permissions:

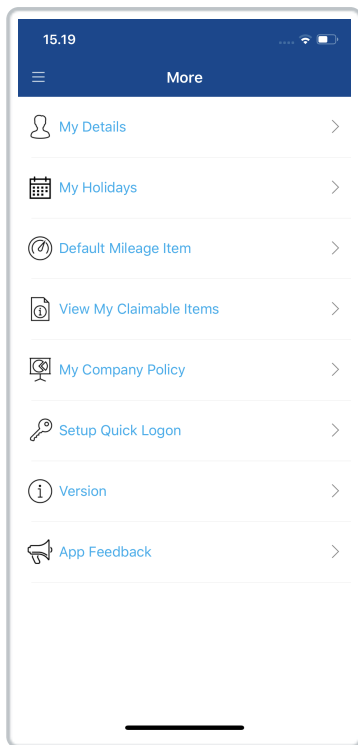

- No permissions required

The following steps describe the process of adding a vehicle from the 'Change My Details' menu. Alternatively, you may also have the option to add a vehicle when adding a mileage expense. Once you have tapped Add Vehicle, both methods will follow the same steps.

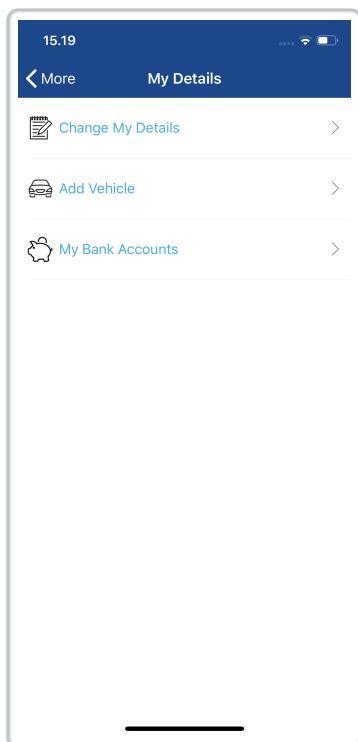

1. Log into **Expenses Mobile**. Tap the **Hamburger Menu** ☰ and then tap **More**.

2. Tap **My Details**.

3. Tap Add Vehicle.

4. Use the toggle to select whether the new vehicle you are about to add should replace a previous vehicle.

- If the answer to this is yes, tap the toggle which will display the 'Previous Vehicle' field. You can then tap this field to select the vehicle which will be replaced.

The screenshot shows a mobile application interface for adding a vehicle. At the top, there is a status bar with the time 15:28 and a navigation bar with 'Back', 'Add Vehicle', and 'Save' buttons. Below the navigation bar is a section titled 'Previous Vehicle' with a toggle switch labeled 'Does this vehicle replace a previous one?' which is currently turned on. Underneath this toggle is a text input field labeled 'Previous vehicle' containing the text 'VAUXHALL CORSA (GF04HJK)'. Below this is a section titled 'Vehicle Details' with several input fields: 'Registration Number *', 'Make *', 'Vehicle Type *' (with 'None' selected), 'Model *', 'Engine Type *' (with 'None' selected), and 'Engine Size (cc) *'. At the bottom is a section titled 'General Details' with a 'Unit of Measure *' field containing 'Miles'.

Note: The 'Previous Vehicle' section will not appear if you have no active vehicles.

5. Complete the **Vehicle Details** section:

Field	Description
-------	-------------

Field	Description
Registration Number	<p>Enter the vehicle registration number to perform a vehicle lookup which will retrieve the Make, Model, Vehicle Type, Engine Type and Engine Size where possible. All fields can still be modified if required.</p> <p>Note: In some instances, the Make and Model may not be found and will need to be entered manually.</p> <p>Note: If a vehicle type of Bicycle is selected, this field will not be available.</p>
Make	Enter the make of the vehicle.
Vehicle Type	Tap this field and then select a Vehicle Type from the available list. Depending upon the vehicle you select, some of the additional fields may no longer be available.
Model	Enter the model of the vehicle.
Engine Type	Select the engine type of the vehicle. Check for non engine vehicles.
Engine Size (cc)	<p>Enter the engine size of the vehicle (cc).</p> <p>Note: It is important you select the correct Unit of Measure and Engine Type as this will ensure correct reimbursement for the distanced traveled. Additionally, please make sure you enter the Engine Size in cubic centimeters (cc); for example 1198 instead of 1.2.</p>

Start Date of Vehicle Usage

Start Date
06/10/2019 ×

Note: The steps below may vary depending upon your organisation's setup.

6. Within the General Details section, select a **Unit of Measure**.
7. Enter the **Start Date** of vehicle usage. If this vehicle is to replace a previous vehicle, the Start Date field is mandatory.
8. Select an appropriate **Vehicle Journey Rate** from the available selection. This will determine the rate of reimbursement that you will receive for journeys in this vehicle.
9. Tap **Save** to store this vehicle information. If your organisation has permitted that a vehicle will automatically be activated after added by a user, this vehicle will then be available for selection. If not, this vehicle will need to be authorised by an administrator before it is available for selection.

Note: After you have saved, a message will appear indicating which additional duty of care documentation is required by your company. This could include your Tax, MOT, Insurance, Service or Breakdown Cover information. When adding these records you will also be required to upload a scanned copy of the documentation.
