February - (14/02/19)

Date: 14/02/19
Version: 2019.2.14.1

Enhancements

- We've added some 'quality of life' updates to the Help & Support menu to create a better user experience. Changes include:
    - Enhancements to the page where you can view internal help articles
    - A new 'Back' button allowing you to return to the original search page after performing a search
    - Updates to the user interface so that it meets current page standards within Assure Expenses. (157250)

Bugs

- Fixed an issue which caused Automatic Mastercard CDF3 card transactions to import as pound sterling, rather than being converted from pence. This caused transaction values to display incorrectly. (161732)

- Fixed an issue where filter rules were not being applied correctly on the Add Expense page after selecting an expense item from the available list. (160651)
