Version: 2019.2.27.1

Bug Fixes

- Fixed an issue where the alpha and numeric codes were displaying incorrectly when adding a new country. (162104)
 - Fixed an issue on corporate card statements where users were unable to correctly sort transactions or swap between pages of transactions. This occurred when multiple statements were available for the user to view.
(154744)
 - Fixed an issue where reports that include allowances were not displaying correctly. (155799)
 - Fixed an issue where spacers were not displaying correctly when viewing a GreenLight Form outside of the form builder. (154937)
 - Fixed a GreenLight issue that caused an error when performing a Torch merge. (161659)
-
