New Feature

Redirect Claims (156682)

We've added a powerful new feature that allows you to browse claims by approver and then redirect those claims to a new approver. This was primarily designed for situations where an approver is not available in the short term such as sickness or holidays, where a delegate has not been set or where a user may have left and their approval duties need redirecting until the Signoff Group is amended. A user with the correct permissions will be able to search for the approver and then move their claims onto other available approvers so that the claim can be processed as fast as possible.

For more information on this feature and how to use it, view:
