Version: 2019.8.8.1

Bug Fixes

- Fixed an issue where split VAT/NET/Total were not being recalculated at the point of submitting a claim. This occurred for users claiming mileage based on fuel receipts where the odometer readings entered were greater than the mileage claimed. (167183)

- Fixed an issue where the costing breakdown was being deleted when reconciling a corporate card transaction with an exchange rate that differed to the exchanged rate of the expense being added. (167211)
