Release Notes - 16 July 2020

Date: 16/07/2020
Version: 2020.7.15.14

Enhancements

- We'll no longer be displaying VAT results from expense items that have gone through the Expedite Validation process. We've made this change to make it more clear that you are unable to change these VAT details. This will affect expense items in **Submitted Claims**, **Previous Claims**, and **Check & Pay**. (174422)

Bug Fixes

- We've fixed an issue where VAT was not being recalculated after editing the date of the expense. This issue occurred if the new date caused the VAT rate to change to a different threshold, as configured on the expense item. (178954)

- We've fixed an issue where the original text for a tooltip wasn't being restored when clicking **Restore Default Text**. (178878)
