

Release Notes - 15 March 2021

Last Modified on 06/11/2024 2:51 pm GMT

Date: 15/03/21

Version: 2021.3.12.1

Enhancements

- We've given Assure Expenses a shiny new makeover to align with the solutions of our new family, Allocate Software. You'll see new fonts and colours, but there is no need to worry; you'll still be getting the same great Assure Expenses experience and functionality! 😊

If you have configured Assure Expenses with a custom colour scheme, only elements such as buttons will be updated to reflect the new default colours, whilst your custom colours will remain as they are. (183493)

Bug Fixes

- We've fixed an issue that caused our API documentation styling to be incorrect. This was caused by a recent update to the Chromium Rendering Engine. (184206)
 - We've fixed an issue that caused password reset keys to be identical every time a password reset request was sent to the same user. (184636)
-
