

Release Notes - 27 April 2021

Last Modified on 06/11/2024 2:51 pm GMT

Date: 27/04/21

Version: 2021.4.23.7

Enhancements

- We've added the ability for admins to automatically archive a user's account upon their termination. Previously, users would have to be manually archived. Now admins can control whether they want to archive a user automatically or manually. We've also added the ability to define a grace period to control the amount of days after a user's termination date until they are archived.

We've also added the ability for admins to set a start date for the activation of a user's account. Previously, adding a new user into the system would automatically activate their account and send a welcome email even if it was prior to their actual start date. Now admins can control whether they want to activate a user immediately or on a given date, while also choosing whether to automatically send a welcome email or not.

This feature can be configured by navigating to **Administrative Settings | Tailoring | General Options** and clicking the **Employees** tab.

For more information, visit [General Options - Employees](#). (184442) (184436)

Bug Fixes

- We've fixed an issue that caused GreenLight data to not be displayed when it was sorted by certain columns. (181899)
 - We've fixed an issue that caused the GreenLight logo on the login page not to load. (185239)
-
