Version: 2023.2.21.4

## Bug Fixes

- We've updated the buttons on the approver declaration so that the style matches other areas of Expenses where buttons are used. (159896)
- We've updated the mobile app to ensure the details display correctly when you dispute an expense item that has been returned during the validation service. (189875)
- We've fixed a problem with the automatic daily exchange rates where an error occurred when the database was configured either with a very large number of currencies or all possible currencies. Now, all exchange rates are imported successfully regardless of the number of currencies. (190749)

## Enhancements

- We've updated the "Duty of Care Reminder Service" with logging and tracing to increase observability. (190325)
