

Release Notes - 05 February 2024

Last Modified on 09/04/2025 10:47 am BST

Date: 05/02/2024

Version: 2024.1.25.3

Bug Fixes

- We've fixed an issue with the action buttons in the mobile app to make them more accessible in dark mode when you set, amend, or remove an address label. (190888)
- We fixed an issue where the wrong options were displayed in the menu when the claim was previously assigned from team approval to an individual. The mobile app displayed the option to assign the claim when it was already in the 'Assigned Claims' and in the 'Approved Claims' section. (192896)
- We've fixed an issue with a numeric user-defined field (UDF) where the value did not save for the UDF if you didn't click on the side before saving. (193679)
- We've fixed an issue in the mobile app that didn't allow you to add a third or more locations when using Build My Journey. (193797)
- We've fixed an issue that appeared when you populated the corporate card data while creating the expense item from the corporate card statement transaction through the mobile app. (193810)
- We've fixed an issue with access to the gallery permissions on some of the later Android devices. (194065)
- We've fixed a bug in the GPS mileage option in the mobile app to ensure that locations are correctly identified and recorded for the journey. (194088)
- We've fixed an issue with photos and video permissions on Android 13 and 14 devices. (194538)

Enhancements

- We've upgraded the GPS mileage component in the mobile app to a functional component so that we're using more up-to-date technology. (193188)
 - We've added an option for resetting the password from the mobile app by providing an email with corresponding details and a link that takes you to the 'Reset Password' view. (193658)
-
