

Release Notes - 18 April 2024

Last Modified on 06/11/2024 1:54 pm GMT

Date: 18/04/2024

Version: 2024.4.16.1

Enhancements

- We've significantly improved the performance of the "Filter Rules" configuration pages. When you add a new filter rule or edit an existing one, we only retrieve the necessary records for the display panel rather than retrieving every parent and child element. We've also changed the saving process of the new filter rule options. Previously, the saving process occurred after you added all changes and clicked "save". Now, the saving process occurs as you create the new records and populate them into the summary display. We've also changed the delete option to work for each individual change rather than by page. Moreover, we've prevented duplicate department, cost code, and code filter rule records, when tailoring options are configured to use descriptions rather than codes. (195261)
