August 2024 | Duty of Care Module Improvements

Last Modified on 14/02/2025 2:37 pm GMT

We're rewriting our Duty of Care module into a more modern service. As a result, we've updated the workflows and business logic for the following features within the module:

- Manual upload of driving licence documents
- Automatic lookups
- Driving licence document reviews

We've updated our Duty of Care reminder service to use the new microservices technology. Now, reminder service emails from our updated service come from "admin@expenses-software.com" for both claimants and approvers.

We've also updated our Duty of Care Reminder Service to use the new Licence Check Lookup API version.
