August 2024 | Duty of Care Improvements | Driver Licence Logging and Tracing

Last Modified on 18/11/2024 4:04 pm GMT

Duty of Care Module Improvements

We're rewriting our Duty of Care module into a more modern service. As a result, we've updated the workflows and business logic for the following features within the module:

- Manual upload of driving licence documents
- Automatic lookups
- Driving licence document reviews

We've updated our Duty of Care reminder service to use the new microservices technology. Now, reminder service emails from our updated service come from "admin@expenses-software.com" for both claimants and approvers.

We've also updated our Duty of Care Reminder Service to use the new Licence Check Lookup API version.

Driver License Logging and Tracing

We've added logging and tracing to the driver licence consent processes to increase our observability.

We've also included account ID information that helps the support team manage any reported issues on the consent processes more easily.
