# Assure Expenses FY24 Q1 & Q2 | Highlights and New Features

Last Modified on 24/11/2025 1:42 pm GMT

We're pleased to share an overview of all the new and enhanced features we introduced to**Assure Expenses** throughout the first half of FY24. We introduced a series of enhancements to Assure Expenses, improving both functionality and user experience.

Your feedback and ideas have played an essential role in shaping these improvements, and we're excited to bring you new functionality and updates that better support your expenses process. 

 Here are some of the highlights:

- **Fuel to VAT Allocation** - We've re-written the feature to allocate mileage VAT to a fuel receipt, in line with the VAT 6th directive, to ensure that performance expectations are met during the allocation process.
- **New Year – New Name!** - We've rebranded our "Selenity Expenses" product to "Assure Expenses," along with updating our company name to "RLDatix."
- **Odometer Readings** - We've enhanced the odometer readings page in the claim submission process to improve flow and overall user experience.
- **Odometer Readings with Automatic Personal Mileage Deductions**- The Expenses system can be configured to automatically deduct personal miles travelled by a driver when the company covers fuel expenses, either through a corporate fuel card or as a reimbursed "Fuel purchased" expense.
- **Single Sign-on with Multi-factor Authentication**- We've updated the login authentication process to allow single sign-on (SSO) to be configured using your organisation's identity provider (IDP), which also then provides multi-factor authentication (MFA).
