

Release Notes - 11 September 2025

Last Modified on 10/09/2025 1:32 pm BST

Date: 11/09/2025

Version: 2025.9.1.1

Enhancements

- We've introduced validation to block flag justifications that contain only whitespace. This applies to both the 'Add' and 'Edit' screens for the mobile app, and the 'POS' and 'PUT' endpoints for the API. We've made this change so that all inputs have meaningful content.
