Version: 2025.11.4.1

Enhancements

- We've made an enhancement to the Duty of Care (DoC) configuration. Now, the system allows users to exclude company cars from DoC and to include private or lease vehicles. We've added the 'Check Insurance', 'Check Tax', 'Check MOT, and 'Check Breakdown Cover' fields to the expense items to provide users with granular control over individual checks based on system settings and item-level configuration.
