2026 - Product Updates

Last Modified on 02/11/2026 1:52 pm GMT

Release Notes - 27 October 2026

Date: 27/10/2026
Version: 2026.10.26.8

Enhancements

- We've implemented automatic browser cache clearing when a new version of Assure Expenses becomes available. Now, users receive the latest version of the application automatically, removing the need to perform a manual hard refresh. (206985)

Bug Fixes

- We've fixed an issue where Greenlight child menus did not display correctly.(206974)
- We've fixed an issue that caused some reports to display an internal server error when users ran them. (206993)
- We've fixed an issue where the work address dates were not able to be amended by the administrator. (206998)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.

Release Notes - 21 October 2026

Date: 21/10/2026
Version: 2026.10.21.2

Enhancements

- We've updated the logon page in Assure Expenses with a more modern design. This change affects the appearance only and does not change the existing functionality, user credentials, or single sign-on (SSO) experience. (201211)
- We've updated all menu pages in Assure Expenses with a more modern design. On the home page, we've moved the most frequently used options to the top of the page, making them

easier for users to find and access. This update changes the visual design only and does not affect existing functionality. (201244)

- We've updated the menu containers and menu icons throughout Assure Expenses with a more modern design. This change replaces legacy components and provides a more consistent user experience across the application. (201247)
- We've added new dashboard tiles that display the number of current claims, claims submitted for approval and past claims. For approvers, an additional tile shows the number of claims awaiting approval. These tiles provide a clearer visual overview, adapt to the selected display theme and provide direct navigation to the relevant area of the system. (201248)
- We've updated the buttons in Assure Expenses, such as 'Save' and 'Cancel', with a more modern design. The buttons now update automatically when users change their selected theme. This enhancement affects the appearance only and does not change the existing functionality. (201252)
- We've updated all summary pages in Assure Expenses with a more modern design. Users can now hide columns they do not want to display, making it easier to customise the information shown on screen. Existing page functionality remains unchanged. (201253)
- We've updated the title bar in Assure Expenses with a more modern design. This change affects the appearance only and does not change the existing functionality. (201245)
- We've updated the breadcrumbs in Assure Expenses with a more modern design. This change affects the appearance only and does not change the existing functionality. (201246)
- We've added a new navigation option to the side menu. Now, when users click their username, Assure Expenses directs them to their account details. (201254)
- We've implemented new high contrast themes in Assure Expenses that allow users to choose their preferred display settings. Available options now include Light High Contrast and Dark High Contrast. These themes help support the latest accessibility standards. (201292)
- We've implemented new themes in Assure Expenses that allow users to choose their preferred display settings. Available options now include Light, Light High Contrast, Dark, and Dark High Contrast. These themes help support the latest accessibility standards. (201251)
- We've implemented a new light theme for Assure Expenses that allows users to personalise the application's appearance. This enhancement helps support the latest accessibility standards. (201234)
- We've implemented a new dark theme for Assure Expenses that allows users to personalise the application's appearance. This enhancement helps support the latest accessibility standards. (201235)
- We've updated the error pages in Assure Expenses with a more modern design and simpler instructions. This includes Page Not Found and permission-related error pages that appear when users do not have access to view content. (201298)
- We've added support for viewing existing receipts in the 'Receipt Wallet' in Assure Expenses. Receipts that users add in the mobile application now appear in the desktop application, giving users access to their receipts across both applications. (199706)
- We've added the ability to upload receipts directly to the 'Receipt Wallet', allowing users to manage receipt images from either the web or mobile application. (199707)
- We've added support for creating expense items from receipts stored in the 'Receipt Wallet'. Claimants can now select a receipt from the wallet and add it directly to their current claim using either the desktop or mobile application. (199708)

- We've added a new option to remove receipt images from the 'Receipt Wallet' in Assure Expenses. This change brings the web application in line with the mobile application experience. (163740)
- We've added OCR processing to provide a consistent experience across the web and mobile applications. When users add a receipt to the 'Receipt Wallet', the system immediately submits the image for OCR processing. If the image quality is sufficient, the system automatically identifies the receipt date, currency, total amount and any sales tax. (199705)

Bug Fixes

- As part of the new UI design, we've fixed an issue on the 'Employees' page where the 'Default Cost Code' dropdown list displayed cost codes in an unsorted order. Assure Expenses now displays cost codes in the correct order, making them easier to find and select. (196669)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.

Release Notes - 13 October 2026

Date: 13/10/2026
Version: 2026.10.8.2

Bug Fixes

- We've fixed an issue where the recommended route map failed to load for mileage expense entries and displayed a Google Maps error message. The route map now loads correctly and displays the journey details and destination. (206528)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.

Release Notes - 29 September 2026

Date: 29/09/2026
Version: 2026.9.24.3

Enhancements

- We've improved scheduled report reliability by updating the scheduler timer and disposal options that caused intermittent schedule execution failures, while retaining the retry logic that limits retry attempts for problematic reports. (206773)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.

Release Notes - 22 September 2026

Date: 22/09/2026
Version: 2026.9.14.4

Enhancements

- We've added support for China, Hong Kong, and the UAE in the GBG Loqate address and distance lookup service, which enables employees in these countries to claim mileage using address-based location validation. (206433)
- We've added a new 'Duty of Care' setting in 'Administrative Settings | Tailoring | General Options | New Expenses' that allows administrators to prevent employees and delegates from approving their own driver compliance documents. When enabled, users cannot approve their own driving licence, or vehicle documents. This enhancement strengthens compliance controls and reduce approval risks. (202900)
- We've enhanced the Data Retention process to correctly remove split expense relationships when deleting eligible expenses. This prevents orphaned records and foreign key constraint errors. (206540)
- We've enhanced the GDPR employee data deletion process to improve the reliability of record removal. The system now identifies and handles additional employee references, automatically clears eligible employee data relationships, and validates mandatory dependencies before processing deletions. (205929)
- We've improved the report scheduler to optimise retry processing and prevent memory leaks. The system now automatically removes failed one-time schedules and applies controlled retries to recurring schedules, improving reliability and performance. (206521)

Bug Fixes

- We've fixed an issue in 'Driver Compliance' where the system did not fully clear the consent status after a user revoked DVLA consent. Employees with a valid manually entered driving licence are now able to claim mileage expenses successfully. (205951)
- We've fixed an issue in 'Driver Compliance' that prevented users from saving non-GB driving licences with a validity period of exactly 12 months. Previously, the system allowed only validity periods greater than 12 months. Now, the system accepts licence expiry dates that are 12 months or more after the start date. (206521)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.

Release Notes - 29 July 2026

Date: 29/07/2026
Version: 2026.7.27.4

Enhancements

- We've made improvements in Driver Compliance, Automatic Licence Lookup, delivering an enhanced Licence Lookup Report. We've renamed the report from "Drivers with DVLA Automatic Lookup Licence where Last Lookup is Older than Lookup Frequency" to "DVLA Licences Not Looked Up Within Frequency Setting" for greater clarity. We've removed the DVLA column to simplify the report layout. We've replaced "Consent Status" with "Consent Expiry Date" to give users more actionable information. (205949)

Bug Fixes

- We've fixed an issue where the password reset limiter incorrectly restricted requests based on IP addresses. Now the system enforces password reset limits correctly and no longer blocks requests based solely on IP addresses. (206206)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email

notifications.

Release Notes - 21 July 2026

Date: 21/07/2026
Version: 2026.7.14.2

Enhancements

- We've strengthened the application security by blocking unauthorised access to claim details through the 'Claim Viewer' 'Print' option. This update resolves a vulnerability we've identified during penetration testing. (203222)
- We've introduced rate limits for password reset requests to improve security. The system now allows up to three requests per email address within 15 minutes and up to five requests across different email addresses from the same IP address. The system displays a clear notification when a user exceeds either limit. (203223)
- We've added CSV and Excel export options to the 'Driver Compliance Credit Usage Log'. The export reflects the filters that users apply. Only users with permission to view the 'Credit Usage Audit Log' can access these export options. (204185)
- We've added a new email notification for bank account additions and updates. The notification provides clients with clear and user-friendly information about account changes. (204458)
- We've increased the data purge timeout value to allow the system to process and delete all eligible records. This change reduces unnecessary data retention and supports compliance with data protection requirements. (205651)
- We've added India to the 'Address Lookup Service'. Claimants can now search for and select addresses when they submit mileage claims for journeys within India. (205689)
- We've updated the 'Duty of Care DVA (NI) Licence' form to require uploads of both the 'Driving Licence Front' and 'Driving Licence Back' images. This change ensures that the system captures current licence evidence for compliance and verification purposes. (205745)
- We've removed the mandatory 'DVA Licence Summary' field and its associated comment box from the 'DVA (NI) Licence' review page. This change simplifies the review process for 'Duty of Care' administrators. (205746)
- We've added a new 'Driver Compliance' report that identifies drivers with valid licences who require a renewed DVLA lookup based on the organisation's configured frequency. The report improves visibility of overdue licence checks and supports ongoing compliance with 'Duty of Care' requirements. (205754)
- We've updated the 'Reports Summary' page with a modernised design and added search and sort capabilities. (2205790)
- We've updated the legacy reports to require an effective date before users apply filters. This requirement ensures that reports return meaningful results based on a valid reporting date. (205819)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.

Release Notes - 09 June 2026

Date: 09/06/2026
Version: 2026.5.22.2

Enhancements

- We've updated 'My Vehicle Documents' so that the 'Delete' permission now controls the 'Archive' option. When users enable delete access for an access role, the 'Archive' option becomes available automatically. (201238)
- We've added new forms for the driver to include the new NI DVL licence types.(204032)
- We've added new forms for the driver to include the new overseas Non-NI DVL licence types. (204033)
- We've added new menus for the driver to include the new NI driver licence types and for the driver to add their licence details. We've also added new menus for the approvers to include the new NI driver licence types and for the approver to review the driver's licence details. (204034)
- We've added new checks for 'Driver Compliance' to include NI licences when the system checks the mileage claims. (204035)
- We've added new standard reports for NI DVL licences information. The users can use the reports to provide information to the organisation. The users can schedule the reports on a regular cadence for monitoring and alerting purposes. (204036)
- We've updated the Licence-related reports to include a new 'Licence Type' column. The system now displays this column in the appropriate position across all relevant reports. (204955)

Bug Fixes

- We've fixed an issue that prevented employees from completing DVLA consent when automatic licence lookup credits were exhausted. The system now processes consent when no credits remain and records these checks in the credit usage log. (204601)
- We've fixed an issue where the system incorrectly calculated the fixed mileage deduction expenses using a higher rate when the users submitted claims after a financial year rollover. The system now correctly applies threshold-aware logic and calculates the mileage deductions based on the appropriate rate for the relevant financial year and claim date. This bug fix guarantees accurate handling of retrospective expense entries and proper adherence to defined mileage thresholds. (204928)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.

Release Notes - 19 March 2026

Date: 19/03/2026
Version: 2026.3.17.2

Enhancements

- We've added a new standard report for 'Driver Compliance' called "Employees With No Driving Licence". The report lists all active employees who do not have a driving licence record. (204018)
- We've added a new standard report for 'Driver Compliance' called "Employees Without Driving Licence Lookup Consent". The report lists all active employees who do not have driving licence consent in place or whose consent has expired. The report displays their first name, surname, email address, and a consent status indicator. (204167)
- We've added a new field to the Lease Car Mile TAS NR NHS ESR element (ID 39) called "Electric Charging Location". The field is fully supported across the user interface, reports, and exports, including both detailed and summary formats. If you want to use the new field and need assistance with configuration, please raise a support ticket. (204204)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.

Release Notes - 11 March 2026

Date: 11/03/2026
Version: 2026.3.3.3

Enhancements

- We've updated the Duty of Care schema by adding new tables and updating existing ones to support the new driving licence types for Northern Ireland. (200803)
- We've enhanced the 'Driver Compliance' credit service by adding a usage log that records when credits are consumed, including the date of use and the associated driver. Driver compliance administrators can now access this log via a new menu option, with filtering available by date range. (201470)
- We've added a new 'Driver Licence Check Credit Usage Log'. The system now records each automatic licence lookup, storing the lookup date, driver details, licence information, and remaining credits. We've also added a new permission-controlled menu option in 'Administrative Settings | Imports/Exports | Driver Licence Credits Log' that enables eligible 'Driver Compliance' customers to view and filter this usage log. (201471)
- We've enabled address and distance lookup support for South Africa by updating the global countries table with the required address lookup configuration. (203736)
- We've enhanced the GDPR claim-deletion process to ensure that all related transaction records are fully validated and handled before removal. The system now performs a more complete and reliable cleanup of linked claim data, improving accuracy and data integrity during GDPR-related deletions. (203872)
- We've added new driving licence types to Expenses for use in the Driver Compliance module. (204030)
- We've implemented a new 'Driver Licence Check Credit Usage Log'. The system now records each automatic licence lookup, storing the lookup date, driver details, licence information, remaining credits, and the usage reason. A new permission-controlled menu option in 'Administrative Settings | Imports/Exports | Driver Licence Credits Log' allows eligible 'Driver Compliance' customers to view and filter this usage log. (204095)
- We've enhanced the deletion logic for corporate card transactions to validate fully and partially reconciled items. Only eligible claims and linked transactions can now be removed, while any claims or transactions involved in non-removable or partially reconciled allocations are automatically protected from deletion. (204194)
- We've added support for the new HSBC 1324 corporate card provider. This includes the required database updates, standard templates, and the ability to import card statements and transactions into the system. (204206)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.

Release Notes - 10 February 2026

Date: 10/02/2026
Version: 2026.2.4.3

Enhancements

- We've added extra validation for non-GB driving licences to require an expiry date. Now, the system ensures that the expiry date is at least one year after the start date, and prevents the record from being saved until valid dates are entered. The same validation has been applied to the API. (196669)
- We've made an enhancement to the 'My Vehicle Documents' workflow. When an approver rejects a document, the system displays it as 'Rejected', allowing the driver to update it. Once updated, the document is moved back to 'Awaiting Approval', allowing the driver to resubmit it. (203749)
- We've updated the daily ESR GO2 scheduled task to detect work addresses with incorrect location IDs and automatically correct them. This ensures claimants are assigned the accurate work address for mileage claims. (204069)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.

Release Notes - 02 November 2026

Date: 02/11/2026
Version: 2026.10.30.2

Enhancements

- We've applied the new UI design to GreenLight, giving users who access the system through GreenLight365 the same modern look and feel as Assure Expenses. Users can now also choose between light and dark themes and select their preferred contrast option. (206971)
- We've updated the Company Select page with a more modern design for users who access multiple systems through single sign-on (SSO). We've also improved performance by grouping users under their associated accounts in an expandable view, reducing load times and making it faster for support users to access customer accounts. (206972)

Zendesk (for system administrators): As a system administrator you can subscribe to Zendesk for more information. To access Zendesk, please click here.

To receive email notifications with information about the latest articles and new comments

added to sections, you can subscribe to Zendesk by clicking **Subscribe**. Within the hyperlinked Zendesk article there is a 'How to' guide that informs you how to subscribe and receive email notifications.
