

# Mobile Release Notes - 06 May 2026

Last Modified on 07/05/2026 3:15 pm BST

Date: 06/05/2026

Version: 2026.3.17.2

## Enhancements

- We've implemented source maps in our Sentry observability platform to improve issue tracking. This makes it possible to view errors against the original source code for easier investigation. (203844)
- We've added support for distributing Android mobile builds through Sentry. This enables internal test and support teams to have easier access to build artefacts. Now, Sentry associates each distributed build with its corresponding release and the teams are able to trace back errors and performance data to the exact app version. (203845)
- We've implemented profiling in our Sentry observability platform. This adds aggregated profiling data that can be used to identify the slowest code paths. (203846)
- We've implemented new metrics in our Sentry observability platform. This adds aggregation and visualization capabilities for monitoring application behavior. (203847)
