Date: 00/00/2026

Version: 2026.5.22.2

Bug Fixes

- We fixed an issue where the system incorrectly updated the 'LastChange' field when updating an employee through the API. The system now updates only 'ModifiedOn' for employee changes and reserves 'LastChange' exclusively for password-related changes. (203077)
- We've fixed an issue in the mobile app where the system incorrectly detected a future date during receipt upload through OCR, causing it to save expenses with invalid future dates. Now, when the system detects a date in the future, it prevents the item from being saved. (204788)
